USB 2.0 PORT REPLICATOR WITH VIDEO

Model #A01042

Easily create a desktop environment for your laptop by simply connecting it to the port replicator with just one USB cable. Connect all the peripherals you need on a daily basis; monitor, ethernet cable, printers, etc., to the port replicator and it conveniently becomes a docking station for your laptop. Excellent cable management, with no need to disconnect and reconnect cables. A perfect solution for hoteling environments. A security lock thread has been added to the back panel for use with CODi's Chassis Key Lock to prevent theft of the device. For added security, CODi's Flex-Head (A02008), can be used to simultaneously lock your computer.

Security Lock Thread
